Personal Statement

I have more than 10 year IT (professional software design, integration and system development) experience in different industries using various programming languages and technologies.

Mostly specialized on back-end system development, different integration processes, microservices, DEVops related technologies, remote banking, content management and portal systems.

Good development practices, documenting and presenting architecture, reuse of code and design patterns, profiling and analysis of application performance and also automation of development process for build, code review and test phases.
