2021-04-23 *(13 hours from now)*

Description:

In Gjensidige Group they are creating an easy to use development environment and machine learning (ML) model-deployment pipeline for analysts which utilizes tools and PaaS/SaaS resources in Azure cloud. They are looking for a new member in Analytics team of excellence who will be allocated to work in a project team with 3-4 colleagues in Lithuania and Norway.

You will be responsible for:

- Setting up pipelines and templates for the whole model-development and deployment lifecycle
- Setting up a secure infrastructure in Azure with enterprise standards (compute, api-deployment, moving data onprem<->cloud)
- Communicating with both cloud architects and infrastructure developers, as well as the analytical teams which they bring into the platform

Qualification and knowledge:

- Familiar with Azure data science suite:

Azure machine learning services (though the Python SDK, CLI and the portal)

Azure container instances or Kubernetes

Azure Devops

Azure data lake gen2

Azure data factory

Azure key vault

- Understanding of whole data science cycle
- Interest and knowledge about network and security
- Python programming language
- VScode IDE with some azure plugins
- Docker-containers
- Identity and role management
- Monitoring tools
- Git
- SQL

You are:

- Curious and excited to develop your skills
- Proactive and driven to as to enrich team with your insights
- Ready to work in international environment across different countries
- Adaptable to changes in projects and needs
- Excited to travel to Scandinavian countries

Company offers:

- Interesting and dynamic work in a growing international company
- Personal and professional development driven by challenging and exciting tasks
- Friendly colleagues
- Good motivation package and common company benefits
- Working environment with high ethical standards and values

----
