Aprašymas:

Arxan is hiring a Junior DevOps Engineer that will take Arxan's DevOps team to the next level. You will be joining a global team that provides development support to the Arxan Engineering Group.

We are on a mission to protect applications so bad actors seeking to compromise an organisation's application security are always unsuccessful. We are the undisputed leaders in our industry and we are looking for people that will help us.

Arxan is an energetic environment in which initiative and innovation coupled with teamwork, openness, and customer focus are valued. We welcome candidates who thrive on challenge in a fast-paced, high-tech, dynamic environment and who value success to join our team.

Responsibilities

- Develop and manage Arxan's mobile testing platform
- Configure and manage complex build environments using Jenkins
- Implement virtual test environments using a variety of Linux image builds
- Configure and support other development resources
- Administer assigned IT systems (dev, test, production)

Job requirements

- Experience with Python development
- Experience Unix/Linux systems

- Excellent oral and written communication skills, including ability to work with remote teams
- Self-directed with the initiative and project management skills to be productive with little direction

Desired Qualifications

- Knowledge of relational database systems like PostgreSQL or MySQL
- Ability to work in interrupt-driven environment with coworkers across several continents and time zones
- Knowledge of Linux shell scripting languages such as Bash
- Experience with AWS, Google Cloud or similar

We Offer

- Opportunity to work in an international company
- Informal work environment
- Competitive salary and potential for performance-based bonuses
- Unifying events and team buildings
- Team meals and snacks in the office
- Private health insurance
