Description:

THE CHALLENGE

Take a challenge to work on a system which helps to optimize the work process for large-scale facade designing company. The system covers a wide range of company process starting from logistic ending with material selection and cost calculation. You will be responsible for the maintenance, optimization and new features development by cooperating with the project management team and a technical person. The dedicated project management team which is built from different company areas will lead to a clear definition of done so there will be no interpretations and misleading requirements in the development process.
