Aprašymas:

The ITBRC team is part of Group Information Security department with colleagues located in Denmark, Lithuania and India. As **Information Risk Analyst**, you will be assigned to very interesting tasks that primarily includes support the IT Security and Risk Assessment process. Your work will be exciting and challenging because you will be able to touch on various technologies, work with variety of different stakeholders and support improvements all over the bank.

They are a part of an organization, which delivers world-class digital financial solutions to customers. We have an understanding that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Our teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy and lead improvement. One more important feature – senior leadership is present on site.

Responsibilities:

Danske Bank is looking for Information Risk Analysts, who will work as part of the ITBRC team to mature IT Security and Risk Assessment service provided by the team, work very closely with Group IT teams to achieve
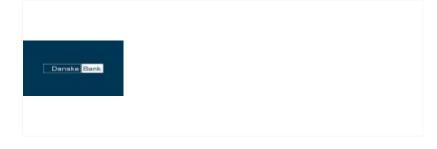

shared goals in terms of IT security. You will contribute to the team by providing the improvements to the existing services and the way how are things being done at the moment, so that further maturity and efficiency would be achieved. As part of your role, you will actively participate in discussions and provide your inputs to narrow down and agree on process scope, improvements and required artefacts (e.g. in scope/out of scope technologies or domains, controls, sufficient evidence requirements etc.

Requirements:

- A degree in IT engineering or equivalent.
- Preferred 5+ years of experience with Information Security, IT Risk Management.
- Good knowledge of IT Risk and IT Control Management processes.
- Professional qualifications: CISA, CISM, CISSP, ITIL (advantageous, but not required).
- Experience with various operating systems, applications, network management technologies, database management systems and information security in general.
- Basic understanding of IT technology and operations, which can be used in a risk, security and quality context.
- Experience in using Service Now toolset.
- Good understanding of IT security principles.
- Understanding of NIST and ISO standards.
- Ability to evaluate business processes and IT technology, identify IT risks, evaluate controls and propose improvements.
- Ability to liaise with individuals across a wide variety of operational, functional and technical disciplines and successful communication with people at all levels of the organization.

Company offers:

- An inspiring environment in a large IT organization
- A perfect opportunity to join a growing IT team and face the challenge and the opportunity to influence and shape the team in Vilnius Work in an international team, which concentrates on innovative business facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
- Highly skilled team and career opportunities
- Cross business career opportunities in bank
