Aprašymas:

Senior Infrastructure Engineer will be responsible for working collaboratively with Bankera software engineering teams: to deploy and operate systems; help out to automate and streamline operations as well as processes; build and maintain tools for deployment, monitoring, and operations; troubleshoot and resolve issues in development; test production environments.

Responsibilities:

- Ensure successful deployments in development, test and production platforms
- Minimize the failure rate of new releases
- Ensure that servers, virtual machines, and working tools are running stable
- Develop and maintain a secure local infrastructure
- Optimize and automate time-consuming tasks

Requirements

- Linux system administration - managing packages and configuration, troubleshooting, scripting
- Container technologies; Docker

- Experience with metrics, monitoring, alerting, and logging systems
- Knowledge and experience in Disaster Recovery strategies
- Working with highly available, scalable and distributed systems; microservices
- Experience with automation/configuration management using Ansible, bash or an equivalent (puppet, the chef is a plus)
- Ability to use a wide variety of open source technologies and cloud services
- Experience with PostgreSQL and MySQL
- Networking; underlay/overlay networks, VPN, subnets
- Understanding of build servers
- Innovative ideas on how to improve cross-functionality
- A working understanding of code and scripts
- Attention to details
- Flexibility
- Ability to find creative, innovative solutions
- Empathy and ability to work in a team
- Good problem-solving skills
- Analytical mindset

Company offers

- Flexible working hours
- Competitive salary
- Modern offices and solid IT infrastructure
- Professional and personal development
- International and talented team
- Employee referral program
- Great team-building events

Confidentiality guaranteed. Only selected candidates will be informed.
