valandas)

## Aprašymas:

A mid-senior Quality Assurance Specialist will review and update existing test cases, as well as create new ones and work closely with other departments in order to continually improve, ensure and develop our product quality.

### Responsibilities:

- Executing manual and automated test cases, verifying, analyzing and reporting results
- Developing and improving automated tests
- Ensuring that products and services meet quality, performance, safety and reliability standards
- Identifying and reporting defects in products
- Verifying defects fixes, improvements, and change requests
- Testing environment maintenance
- Contributing to acceptance criteria development with a Product Manager and the team
- Preparing all needed materials for testing (check lists, test data, etc.) and writing documentations.

## **Requirements**

- Testing of web, Back-End and mobile applications (applying required selected methods and techniques) that may include but are not limited to:
- Functional testing
- Usability testing
- Integration testing
- Load testing
- Exploratory testing
- Regression testing
- Maintenance testing
- Knowledge about testing tools
- Understanding of the full software development lifecycle from requirements gathering to delivery and support
- Awareness of test automation and ability to spot points of value in the process
- Attention to details
- Empathy and ability to work in a team
- Ability to identify technical/non-technical issues
- Good problem-solving skills
- Analytical mindset
- Good time management and organizational skills.

## **Company offers**

- Flexible working hours
- Competitive salary
- Modern offices and solid IT infrastructure
- Professional and personal development
- International and talented team
- Employee referral program
- Great team-building events

Confidentiality guaranteed. Only selected candidates will be informed.
