Description:

Job description

We're currently growing our Kaunas based front-end team and we're looking for two mid level developers to build new web applications and maintain old ones. If you're looking to work in a well established company with an elite team of engineers, then this role is for you. You'll be working in a company that received an investment last year and we're using it to reinforce our international team. Successful candidates will build client facing TravelTime platform applications and would join a three person front-end team based in Kaunas.

Responsibilities:

- Work with designers and developers to develop modern, intuitive user interfaces for our web properties
- Requirements
- 2+ years of professional development experience
- Outstanding HTML, CSS and Javascript experience
- Experience with statically typed languages like Typescript, Java
- Understanding of RESTful Web Services
- Great interpersonal and communication skills
- Understanding of basic UI/UX design principles

- Ability to debug and understand issues in full stack environment
- Experience with React/Redux, React.js, Angular or similar framework

Not required but a plus:

- Experience of working with functional programming or Scala
- Familiarity with Docker

We offer

The base salary is €1500 - €2400 per month after taxes, but we'll be making a salary offer that matches your experience, educational background, and job skills. We offer employee stock options, gym subscription, a flexible schedule and a possibility to work remotely after a year if needed. Half of the day per week can be dedicated for learning and working on open-source projects. We also provide any equipment you would need for work. All this is possible as long as you are okay to work from around 10/11 am to 18/19 in GMT+2 and attend daily 11 am online stand-up meetings. We also have team gatherings in Kaunas office up to 3 times a year.

Salary

1500-2400 eur/mon. net
